FREED FROM A NET NIGHTMARE
Datawind Pocketsurfer 2 £180
www.pocketsurfer.co.uk

Mobile internet addicts are persistent. Watch as they sneak to the loo to check Facebook or fire off IMs under the table. Theirs can be an expensive habit, but thankfully Datawind has developed the Pocketsurfer 2. It only uses GPRS but achieves spiffing speeds through clever compression. It can't do YouTube or sound, but you can browse for 20 hours per month for free or get unlimited data for £6 per month. Net junkies will find their fingers glued to its QWERTY keyboard.
